- (ii) *Attempt all the parts of a question together.*
- (iii) *Stick to the word limit wherever prescribed.*

SECTION – A**(Unseen Comprehension)**

1. Read the passage given below and answer the questions that follow :

One of the things that distinguishes man from other animals is the power of speech. While it is true that most animals and birds can utter cries which indicate emotion, anger, fear, affection, their range of sounds is very limited, and they are not capable of expressing more complicated emotions. On the other hand, man can express a very wide range of ideas and emotions through speech. Words are only symbols to which special values and meanings have become attached by general agreement.

The same object, consisting of printed pages and a cover, is called by a French speaker *livre*, by an English speaker *book*, and by a Hindi speaker *kitab*, the object is the same in each case, but in each linguistic community a different word to describe it has been agreed upon. Other symbols may be used instead of linguistic ones : a red light is used to indicate danger; a policeman's upheld hand tells us to stop; a forefinger held to the lips warns us to be quiet; but these substitutes are fairly few in number and therefore, cannot be used except in very limited circumstances.

Questions :

1 × 6 = 6

- (a) What distinguishes a man from an animal ?
- (b) What can most animals and birds utter ?
- (c) What can man express through speech ?
- (d) What are words ?
- (e) What does a red light indicate ?
- (f) Find a word in the passage which means 'differentiates'.

Salt, a miraculous gift of nature, is one of most useful and amazing minerals on Earth derived from the sea and rocks. Do you know that it is the only rock that humans can eat ? Salt has seasoned our history, language and food, besides making nutritious foods more palatable. Used in all bakery products, prepared foods, sauces, soups, spices, cereals, dairy foods, meats, poultry. It is also an extraordinary effective food preservative, retarding the growth of spoilage by micro-organisms and making food storage possible long before refrigeration.

How much salt is necessary for human consumption ? Medical experts agree that everyone should practice some reasonable 'moderation' in salt consumption. For the average person, a moderate amount might run from 4 to 10 gm a day, or roughly half to one and one-third teaspoons. The equivalent of one to two gm of this salt allowance would come from the natural sodium in food. The rest would be added in processing, preparation or at the table.

Questions :

1 × 6 = 6

- (a) Name the only rock that humans can eat.
- (b) What is salt derived from ?
- (c) Write any two uses of salt.
