English speaking people, that is, on the whole, an advantage. On the other hand, it is often confusing to have the whole language poured over you at once. Ideally, a step by step course should accompany or lead up to this experience. It will also help a great deal if you can easily get the sort of English books in which you are interested. To read a lot is essential. It is stupid not to venture outside the examination 'set books' or the text books you have chosen for the intensive study. Read as many books in English as you can, not as study material but for pleasure. Do not choose the more difficult books you find, with the idea of listing and learning as many new words as possible. Choose what is likely to interest you and be sure in advance that it is not too hard. You should not have to be constantly looking up for new words in the dictionary, for that deadens the interest and checks real learning. Look up a word here and there but, as a general policy try to push ahead, guessing what words mean from the context. It is extensive and not intensive reading that normally helps you to get interested in extra reading and thereby improve your English. You should enjoy the feeling, what extensive reading gives, some command of the language. As you read, you will become more familiar with words and sentence patterns you already know; understanding them better as you meet them in more contexts, some of which may differ only slightly from others.
